Bachelor of Computer Application

Bhagwan Mahavir University, Surat.
July-2022 to June-2025

PROJECT

HOSPITAL MANAGEMENT SYSTEM

Tech Stack: WIX / React.js / Vite / TAILWIND CSS

- A comprehensive hospital management system with patient records, appointment scheduling, and medical staff management features.
- It offers features such as patient registration, appointment scheduling, and billing management. The platform aims to enhance the efficiency of hospital administration and improve patient care through digital solutions.

MIND MAP TOOL

Tech Stack: @reactflow/node-resizer / Prisma / y-WebSocket

- Designed an intuitive interface for creating and connecting ideas visually.
- Enabled dynamic node linking, zoom, and drag functionality.
- Used Redux for complex state management and performance optimization.

WORLD WATCH - GLOBAL TIME ZONE APP

Tech Stack: React.js / Prisma / zustand / react-leaflet

- A global news aggregator with interactive maps showing news coverage and events from around the world.
- News aggregator, presenting a curated selection of global headlines spanning various topics such as politics, technology, science, and culture. The platform aims to provide users with concise summaries and links to full articles, facilitating easy access to current events from reputable sources.

VEGGIEBITE - VEG RECIPES FINDER

Tech Stack: Node.JS / Express / MongoDB / JS

- A RESTful API backend for a vegetarian recipe sharing platform with user authentication and recipe management.
